Gays Take Some Undeserved Raps

National Observer computes: "Ten per cent of the U.S. population is homosexually inclined." Ten per cent!

That's 21.5 million persons.

Assuming two parents each, one-fourth of the population of our country—64.5 million—is knowingly or unknowingly affected.

These are statistics that the "straight" world, like it or not, is going to have to live with.

Paul Harvey

The scoutmaster who misuses Cub Scouts, the prison convicts who misuse one another — they are not "gay." This is not what most news services persist in calling it: "homosexual crime."

The scoutmaster and the convict are rarely if ever "gay."

This is "sodomy." Sometimes it is "sadism." But it is not "gay" behavior.

THE DIFFERENCE IS that between love and rape, the difference between sex and perversion of sex.

The recent row in Dade County, Fla., had to do with residential zoning. Some of those opposed protested that a "gay" couple moving in next door would menace neighborhood children.

So once again the gays have taken the rap for the criminal molesters who are almost always straight — with wives and children and a sickness symptomized by sadism.

Many if not most of the seagoing pirates of the 17th and 18th centuries were homosexuals.

But Dr. B. R. Burg, associate professor of history, Arizona State University, explains that these pirates "became homosexually oriented due to their isolation, due to the scarcity of women."

THE MODERN PARALLEL is the inevitable homosexuality in the military and in prison.

So once again the gays have taken the rap for those who would practice sodomy for the sake of convenience — analogous to the frustrated, isolated herder of sheep.

"Effeminacy," a frequent source of amusement and/or irritation to many straights, is something else again.

Prof. Daniel Capon, University of Toronto, says that even high-rise apartment dwelling can tend to make a man effeminate. He believes that being relegated to housewifely chores tends to emasculate masculinity.

So once again — more out of ignorance than malevolence — the gays have taken the rap for a trait frequently unrelated to sexual preference.

Homosexuality in Russia was punishable by law a hundred years ago, with separate laws dated 1843, 1865 and 1885 — laws decreeing hard labor in Siberia for homosexuals.

Most Russian homosexuals closeted themselves.

Had the laws been successfully enforced — against the ambiguous and sometimes incorrectly labeled practice of homosexuality — those laws would have silenced forever the magnificent music of Peter Ilyich Tchaikovsky.

SUGGESTIONS!

***Ads accompanied by photos are by far the most effective

***Photos of good contrast (not too light nor too dark) reproduce the best. Polaroids are fine; black and white pictures are superior (for our purposes) to color,

***Including a phone number in your ad will yield the greatest response. But only do so if you are prepared to answer the phone a lot and if you don't mind fending off an occasional crank call.

***Ads with home addresses or P.O. Box numbers will generate a bigger response than coded ads, but those for whom discretion is paramount should seriously consider coding their ad.

ADVERTISE!!

Judging by the feedback we receive from our advertisers, people who include a photo with their personal ad, enjoy by far the best results. No matter how interesting or complete your personal ad sounds, readers tend to be more enthusiastic when they have some sort of visual proof (naked or otherwise) that swinging with you might be enjoyable. And don't let the fear of being recognized discourage you; there are countless ways to be photographed without revealing your identity. And quite often these "non-facial" shots can be more tasteful and enticing than those which show everything. If you are serious about swinging, we strongly suggest you spend a little extra time and money to come up with a good photograph to accompany your ad. You'll be glad you did.

Restroom Graffiti Tells All

PEOPLE MAY BE surprised to
hear that little girls are just as
dirty minded as little boys ... at
least when it comes to graffiti.

A study by 120 Minnesota
college students has found that
there is just as much obscene
graffiti in girls' bathrooms as
boys'. The survey also found lit-
tle difference between the con-
tent of the scribbles on the
walls in service stations and in
churches.
